VACUUM ACCUMULATOR SYSTEM

THESE VACUUM ACCUMULATOR SYSTEMS ARE A GREAT VACUUM SOURCE SOLUTION FOR OUR PORTABLE GRID SYSTEMS AS WELL AS BEING IDEAL FOR THOSE WORKING CONDITIONS THAT INVOLVE WARPED OR POROUS MATERIALS. THE TANK RETAINS AND PRESSURIZES VACUUM IN MUCH THE SAME MANNER AS AN AIR COMPRESSOR COMPRESSES AIR. A MUCH GREATER INTIAL 'BLAST' OF VACUUM BASICALLY SUCKS THE WARP RIGHT OUT OF THE MATERIAL. THESE UNITS COME EQUIPPED WITH A WATER TRAP SYSTEM TO ENABLE USE UNDER FLOOD COOLANT CONDITIONS. WE OFFER VARIOUS PUMP & TANK COMBINATIONS TO ACCOMODATE YOUR NEEDS.
